Meyercord Brand Equipment

The source for tax stamping equipment and service solutions for the distribution industry.

Who We Are

The Meyercord Company was originally founded by George Meyercord in 1894 as a lithography shop specializing in decoration and ornamentation. In 1954 the company, now known as Meyercord Revenue, introduced the FUSON® cigarette tax stamping system which provided a simple, cost-effective, and secure way to collect state and municipal taxes.

Illinois Tool Works Inc. (ITW) acquired Meyercord Revenue in 1997 and provided the company with resources to expand its business focus. In 2007, the company was divided into two distinct business units. Meyercord Revenue would continue its focus on security printing while the second company would develop and service tax stamping equipment and accessories. Meyercord Brand Tax Stamping Equipment now operates under the parent company United Silicone, an ITW Decorating Company that specializes in the design and production of standard and custom hot stamp and heat transfer decorating machines.

The United Silicone Building in Lancaster, New York.

What We Do

A line of VL-10 Stamp Machines being assembled.

A leading business corporation with over 50 years of experience, Meyercord brand tax stamping equipment and service are the source for tax stamping equipment and service solutions for the distribution industry. United Silicone application and auxiliary equipment are field proven. They are reliable, cost-effective and operate easily with a minimal amount of training.

United Silicone's specially trained technicians are dedicated to keeping your equipment in the finest working condition. Our service professionals install equipment, train machine operators, provide regular preventive maintenance and promptly attend to any emergency calls.

VL-10HP Tax Stamping Machine

High-speed, post-stamping tax machine that is perfect for customers looking for the ultimate in post-stamping technology.

The VL-10HP Tax Stamping Machine is supercharged up from 70 cartons per minute to a consistent 90+ cartons per minute. Perfect for both pre- and post-stamp operations, the VL-10HP needs no purging or head-height adjustments. Differing carton sizes are now supported by sturdier springs that maintain a longer life than standard VL-10 springs. An improved dual-head glue and closer system compensates for multiple carton feed direction. The VL-10HP's servo-driven carton indexing system speeds set-up time and drastically limits the need for adjustments.

Post-stamping is now fast stamping.

Machine Highlights

- No Adjustments Necessary - Stamps Regulars, Kings, 100's and 120's
- Dual Direction Flap Feed - Glues leading or trailing carton flaps
- Heavy Duty Support Springs - Longer life than standard springs
- Improved Stamp Cartridge - Consistent roll take-up, solid aluminum casing
- Dual-Head Glue System - Precisely applies glue and firmly secures cartons
- Servo-Driven Indexing System - Fast set-up and limited adjustments

Specifications

Pre-Stamping: 90+ Cartons/Minute
 Post-Stamping: 90+ Cartons/Minute
 Clearance Length: 11' 2"
 Width: 10' 4"
 Maximum Machine Height: 5' 8"
 Machine Weight: 1,700 lbs.
 Shipping Weight: 1,900 lbs.
 Electrical: 220-230 VAC, 30Amp Single Phase 60Hz
 Air: Clean, Dry Air Requirement - 7CFM @ 90psi

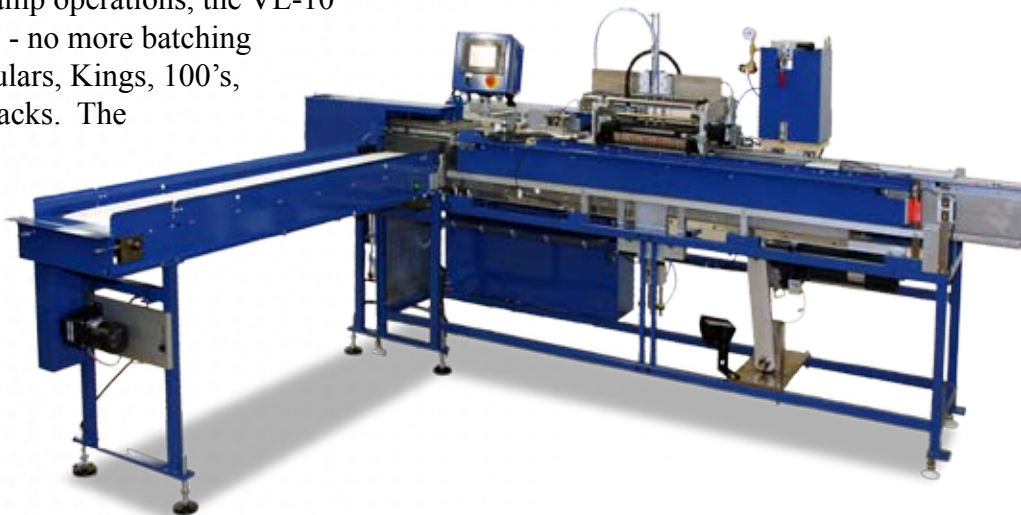

Options & Accessories

- Tandem and Triple Stamp Heads
- Remote Diagnostic Capabilities
 - Universal Case Packer
 - Lateral Packing Conveyor
 - Flap Printer
 - Packing Table
 - Angle Drop Table
- Additional Stamp Cartridges
 - Compressed Air System

VL-10 Tax Stamping Machine

United Silicone's VL-10 Tax Stamp Machine gives you quality and flexibility for the future.

Ideal for both pre- and post-stamp operations, the VL-10 requires no height adjustments - no more batching sizes ever again! Stamps Regulars, Kings, 100's, 120's and some promotional packs. The VL-10 utilizes a proven stamp head with superior stamp quality transfer. The uniquely designed stamp cartridge makes loading stamps easy and fast - ideal for multi-jurisdiction stamping. Simple to train, easy to operate, and requires low maintenance - the VL-10 Stamp Machine is ideal for your operation.

"We have two VL-10 machines and they have made our lives a whole lot easier! We stamp for six states and the interchangeable cartridges make the change-over easy. Our operators love not having to make adjustments on this machine. It's just so simple!"

*Billy Overton, Facility Service Manager
CVS/Pharmacy, Knoxville, TN*

Machine Highlights

- No Adjustments Necessary - Stamps Regulars, Kings, 100's and 120's
- Stamp Cartridge - Quick release and load of stamps
- Stamp Transfer - Superior quality center pack stamping
- Hot Glue System - Precisely applies glue and firmly secures cartons
- Touch-Screen Display - Makes tracking, diagnostics and training easy
- New Stamp Cartridge design and guarding protects your operators

Specifications

Pre-Stamping: 70+ Cartons/Minute
Post-Stamping: 70+ Cartons/Minute
Length: 10' 3"
Width: 10' 10"
Maximum Machine Height: 5' 1"
In-Feed Conveyor Height: 3' 1"
Machine Weight: 1,250 lbs.
Shipping Weight: 1,500 lbs.
Electrical: 220-230 VAC, 30Amp Single Phase 60Hz
Air: Clean, Dry Air Requirement - 5CFM @ 90psi

Options & Accessories

- Tandem and Triple Stamp Heads
- Remote Diagnostic Capabilities
 - Universal Case Packer
 - Lateral Packing Conveyor
 - Flap Printer
 - Packing Table
 - Angle Drop Table
- Additional Stamp Cartridges
 - Compressed Air System

SSMC Encrypted Stamp Platform

United Silicone's SSMC Encrypted Stamp Platform increases productivity while providing quality stamping.

United Silicone's SSMC Encrypted Tax Stamp Machine increases productivity while providing quality stamping. Perfect for high volume pre- and post-stamping operations, the SSMC automatically adjusts for stamping Regulars, Kings, 100's, and 120's. The SSMC Encrypted Tax Stamp Machine utilizes a reel-to-reel and vision system that applies and monitors digital stamps required by some states. The user friendly touch-screen guides operators in monitoring production and directs in diagnostics. The SSMC integrates seamlessly with the Universal Case Packer.

Machine Highlights

- High-Speed Stamping
- Advanced Camera System - Reads and analyzes data faster
- Adaptive Stamp System - Measures carton length and applies stamps accordingly
 - MSA System - Complies with the state of Massachusetts
 - Stationary Carton Opener and Closer - Reduces moving parts
- Pressurized, Vertical Glue Pot - Precisely applies glue and firmly secures cartons
 - Servo-Drive Chain System - Built-in torque overload sensor, self-homing

Options & Accessories

- Universal Case Packer
- Lateral Packing Conveyor
- Packing Table
- Angle Drop Table
- Modem for Remote Troubleshooting
- Compressed Air System

Specifications

Pre-Stamping: 100+ Cartons/Minute
 Post-Stamping: 30-50+ Cartons/Minute
 Depth: 7' 1"
 Width: 10' 1"
 Maximum Machine Height: 6' 0"
 Machine Weight: 1,800 lbs.
 Machine Weight with Universal Case Packer: 2,600 lbs.
 Electrical: 220 VAC, 30Amp Single Phase
 Air: Clean, Dry Air Requirement - 3CFM @ 90psi

CC-612 Case Cutter

Reduce cost while increasing productivity with United Silicone's CC-612 6M and 12M Case Cutter.

The CC-612 cuts both 6M and 12M cigarette cases simultaneously without operator and adjustments. Suction cups pull away corrugate from inner cartons while rotary blades cut cases, minimizing damage significantly. The robust construction of the CC-612 is safe and easy for operators to use. The CC-612 6M and 12M Combo Case Cutter is ideal for locations that are increasing variety and 6M case inventory, high volume stamping operations, and those spending significant dollars on hand cutting cases.

"We've had the Meyercord CC-612 case cutter for nearly a year now and it has paid for itself. We no longer need a full-time person to cut 6M cases, and it's faster than our previous cutters, so we get more productivity all around."

*Trevor Martin, VP of Operations
Cooper-Booth Wholesale, Mountville, PA*

Specifications

7.5 Cases/Minute

Case cutting sizes without retooling change-overs:

6M case from 25.75"L x 12.63"W x 11.50"H to 14"L x 7.75"W x 9.75"H

12M case from 25.75"L x 12.63"W x 23.06"H to 14"L x 7.75"W x 19.50"H

Infeed-Side Width: 7' 4"

Length: 10' 5"

Machine Weight: 3,100 lbs.

Shipping Weight: 3,550 lbs.

Electrical: 220-230 VAC, 30Amp Single Phase

Air: Clean, Dry Air Requirement - 12CFM @ 100psi

Conveyor System Preparation

- Conveyor Height: 2' 0" or 2' 5"
- Minimize Back Pressure at Case Cutter In-feed
- Consult your Meyercord Sales or Service Technician for assistance
- Your Conveyor Provider may offer other specific details

Options & Accessories

- Right Egress Configuration
- Custom Conveyor Heights
- Machine Height Adjusters and Castors
- Compressed Air System

Universal Case Packer

An efficient tool for increasing productivity to your stamping operation.

Complemented with Meyercord brand tax stamping equipment or others, the Universal Case Packer can pack cigarette cartons back into cases at a rate of up to 120 cartons per minute. The machine self-adjusts to accept varying carton sizes. Flexible side plates float to accommodate packing of regular to 120's cartons - making it also ideal for post stamping operations. Cases are held in place requiring no operator intervention. The case packer integrates with Meyercord brand tax stamping machines and can be controlled from the touch-screen, which includes stopping and starting to prevent jamming.

Specifications

120 Cartons/Minute
 Length: 7' 6", Width: 4' 0"
 Maximum Machine Height: 8' 4"
 In-Feed Conveyor Height: 2' 8" - 3' 0"
 Machine Weight: 620 lbs., Shipping Weight: 780 lbs.
 120 VAC, 15Amp, Clean, Dry Air Requirement - 13CFM @ 100psi

HCC-612 Case Cutter

A compact, case-cutting solution for increases in inventory.

Like its full-sized counterpart, the HCC-612 "Half-Sized" Case Cutter cuts both 6M and 12M cigarette cases simultaneously without operator and adjustments.

Suction cups pull away corrugate from inner cartons while rotary blades cut cases, minimizing damage significantly. The HCC-612 Case Cutter is ideal for locations that are increasing variety and 6M case inventory, but may not have the space for a full-sized CC-612 Case Cutter. the HCC-612 can also be configured as an in-line cutter.

Specifications*

7.5 Cases/Minute
 Case cutting sizes without retooling change-overs:
 6M case from 14"L x 7.75"W x 9.75"H to 25.75"L x 12.63"W x 11.5"H
 12M case from 14"L x 7.75"W x 19.56"H to 25.75"L x 12.63"W x 23.06"H
 Infeed-Side Width: 5', Length: 10' 5"
 Machine Weight: 1,950 lbs., Shipping Weight: 2,200 lbs.
 220-230 VAC, 30Amp Single Phase, Clean, Dry Air Requirement - 8CFM @ 100psi

**Customization of this machine to conform with your operation may change specifications*

Ancillary Equipment

United Silicone's ancillary items are designed to work great for specific customer demands.

MTS-110 Manual Stamping Machine

With no special training or skills required, the MTS-110 Manual Tax Stamp Machine can satisfy your stamping requirements with a compact and portable solution. Operable on any sturdy table or work area, this manual stamper is equipped with interchangeable heater bars. With one single motion the MTS-110 applies ten (10) stamps to a standard carton or, with a quick changeover to the alternate iron head, to a wide carton (1×10 configuration). There is also a side-mounted glue pot for convenient resealing.

LPC Lateral Packing Conveyor

The Lateral Packing Conveyor can be used to transport stamped cartons from your SSM Synchronized Stamp Machine or VL-10 Tax Stamp Machine to a designated packing area using the LPC's moving belt. Because of this, the Lateral Packing Conveyor can turn your stamping facility into a one-person operation all while increasing productivity. The LPC also communicates directly with your VL-10 or SSM Tax Stamping Machine, stopping the stamper if cartons are backed up.

Large Flap Carton Printer

Our large flap printer is a reliable, low cost ink jet system adapted to our stamping equipment for marking and coding cartons. It offers highly reliable thermal jet technology, high-resolution printing, and easy-to-change ink cartridge. An internal detection system provides the user with "ink low" and "ink out" status of ink cartridges. Lift the hinged cover of the print head to find a disposable ink cartridge that is simple to snap-in and snap-out for easy ink replacement.

Ancillary Equipment

Meyercord's ancillary items are designed to work great for specific customer demands.

The Hot Hand 300 Hand Iron

The Hot Hand 300's dual heads are interchangeable to stamp both 1×10 and 2×5 carton configurations. With an adjustable temperature range from 260°F to 340°F and weighing in at only three pounds, the Hot Hand 300 is one very versatile hand-stamper. A “cool touch” ergonomic handle, an illuminated on/off switch and a heat-resistant power cord also make the Hot Hand 300 a very safe solution to your stamping needs.

United Silicone Air Compressor Package

United Silicone's air compressor package includes a 5.0 HP compressor producing 18.1 CFM at 90 PSI, a compatible refrigerated compressed air dryer, all required fittings, and installation. Both the compressor and dryer are engineered for 100% continuous duty. The air dryer eliminates troublesome water and removes unwanted particles to the micro level, prolonging the life of your tax stamping equipment and reducing the need for costly service in the future. Clean, dry air is a standard requirement for Meyercord brand equipment installation and warranty coverage. United Silicone's air compressor package is highly recommended for all Meyercord brand tax stamping machines, case packers, and case cutters.

Order Verification Systems

Meyercord brand tax stamping machines can be customized to accept many industry standard order verification systems such as SmokePick® from Velocity Alliance. Please call us at (800) 639-3799 for more information.

United Silicone Service Plans

Platinum Level Service Plan

Customized multiple-call packages

Preventive/Service Maintenance: Let us design a custom service call package that makes sense for your complete operation.

Discounted Parts and Service: Includes 15% discount off manufacturers list prices for parts and hourly service and call rates.

Always Free Technical Phone Support: Call (800) 639-3799

Gold Level Service Plan

Pay for a call package and save over pay-per-call rates

Preventive/Service Maintenance: Packages of either four (4), six (6), or eight (8) visits can be purchased. Preventative Maintenances will either be evenly scheduled throughout the 12 month period or used based on customer requirements and scheduled at any time.

Multiple Machine Discount: A discount of 6% off annual price for three or more contracts (per location).

Discounted Parts and Service: Includes 15% discount off manufacturers list prices for parts and hourly service and call rates.

Always Free Technical Phone Support: Call (800) 639-3799

Silver Level Service Plan

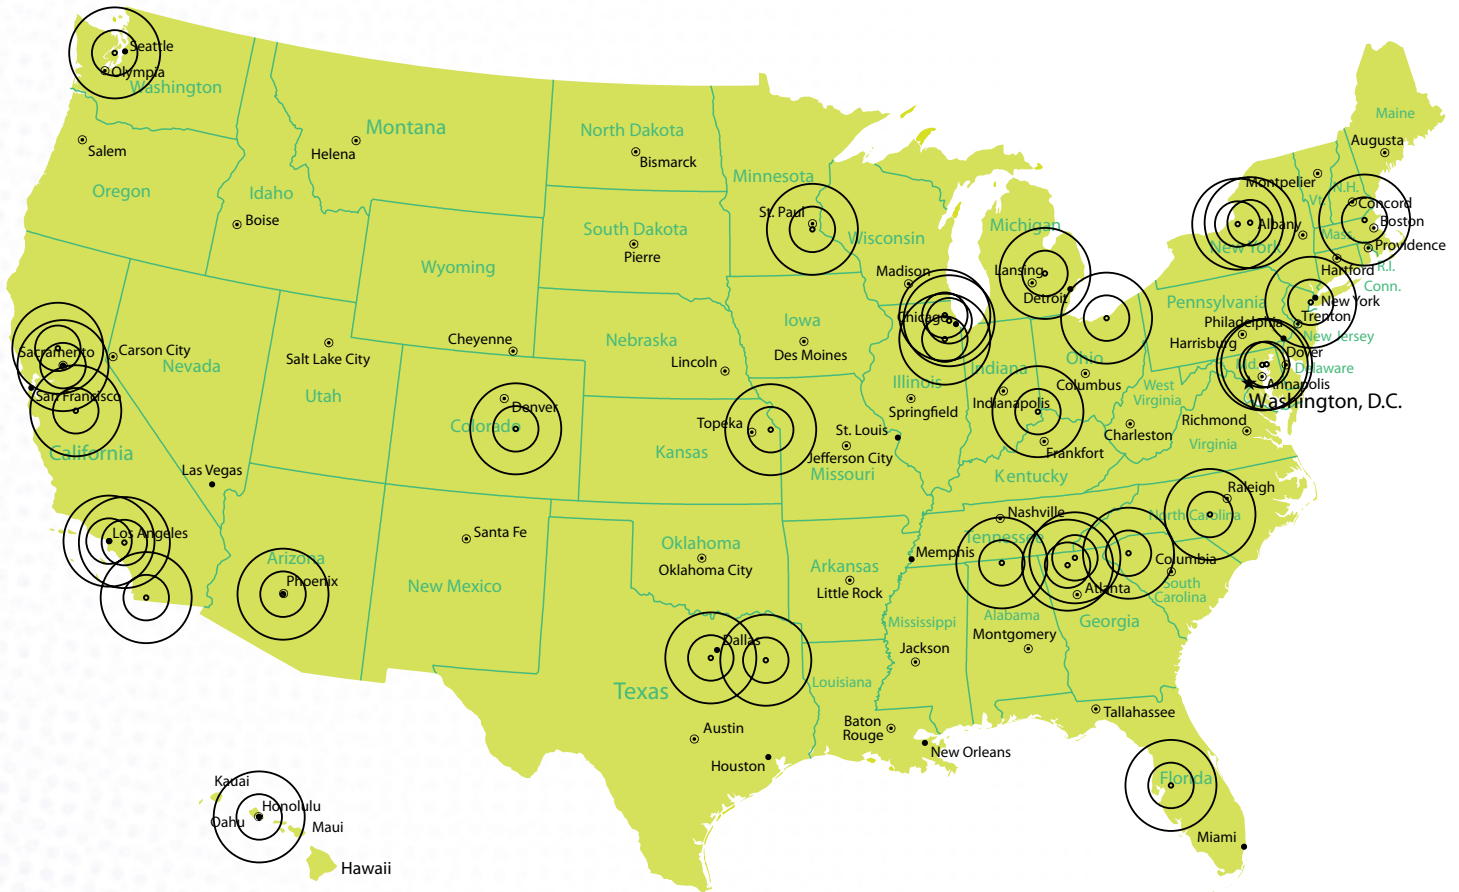

Pay-per-call charges and hourly rates

Hourly Rate Service: All hourly rate time and material reactive service calls are billed a Call Charge Rate dependent on customer zone. Hours are billed in half-hour increments. Rates apply to installation, service, cleaning, preventive maintenance, site surveys, and removal of equipment. Parts (not covered under warranty) are at manufacturer's list price. Emergency maintenance service will be on demand during regular service hours.

Always Free Technical Phone Support: (800) 639-3799

Service Coverage Areas

Service plan pricing rates are dependant upon distance from the locations of our field service personnel who are located near many major metropolitan areas.

UNITED SILICONE SERVICE
A Division of

3 The attending service personnel will try to correct your problem over the phone. Phone service is *always free of charge*. If the problem cannot be resolved over the phone, the attendant will find an available technician in your service area. You will soon receive a call with the technician's approximate time of arrival.

Calls taken after 3:30 PM CST will be addressed the following morning by the dispatch office.

Our goal at United Silicone Service is to answer a technical problem within 24 to 48 hours depending on your distance from the closest technician. Although we try very hard to meet this goal, there are some customers that may take longer to reach because of extreme distance to a technician. We will let you know beforehand if we expect a delay in service.

Meyercord Service also strives for complete satisfaction. If there happens to be a time conflict with a local technician and another cannot reach you sooner, customers with service contracts will take priority with their technical problems over those without.

4 Once the technician has solved your on-site problem, they will fill-out a report that outlines the work done, the parts used, and any applicable charges. You will receive a copy of this report for your records.
