

**ALL CARTONS ARE NOT CREATED EQUAL.**

With input from our distributors, United Silicone and Meyercord brand equipment set out to create a tax stamping machine that would stamp a wide range of carton sizes without having to measure. At the same time, we sought a simpler machine that would be operator friendly and require less maintenance during its usage life. With the **VL-10 Tax Stamping Machine's** patented spring-bed technology that lifts cartons to the stamping head, a unique quick-remove stamp cartridge that makes multi-jurisdictional stamping a breeze, and a chainless drive system, the **VL-10 Tax Stamping Machine** is the perfect merger of those two ideals. With features designed to make stamping easier, the VL-10 is clearly *the most efficient post-stamp machine on the market today*. Call us at (800) 639-3799 to hear more about the **VL-10 Tax Stamping Machine** along with our entire line of Meyercord brand tax stamping and ancillary equipment.
